

WEEKLY HARVEST REPORT – October 3, 2025

With final HRS and durum data this week, this will be the last weekly harvest report for the year. The overall average HRS grade is U.S. No. 1 Northern Spring (NS), and the overall average northern durum grade is U.S. No. 2 Hard Amber Durum (HAD). Comprehensive quality data will be made available in USW’s Crop Quality Report later this month. U.S. Wheat Associates wishes to thank the people and organizations that make our annual Harvest Reports and Crop Quality Reports possible.

HARD RED SPRING

- Wheat Data:** With all samples collected, this is the final weekly harvest report for HRS. The average protein content at 14.3% (12% mb), is unchanged from last week and slightly below the five-year average of 14.5%. Test weight averages 61.5 lb/bu (80.9 kg/hl), up from last year’s final average of 61.1 lb/bu (80.4 kg/hl). The average falling number is 415 seconds, indicating a sound crop. Average vitreous kernel content is 60%, supporting a grade of No. 1 Northern Spring (1NS). While DHV was lower in the early weeks of sampling, it has risen gradually; however, it remains 7 points below last year and 6 points below the five-year average. Overall, the final data indicate an average crop with slightly lower DHV. The quality lab at North Dakota State University is completing flour and dough testing on the composites for the full HRS regional crop quality report and USW's 2025 Crop Quality Report

NORTHERN DURUM

- Wheat Data:** With the completion of sample collection, this report represents the final weekly update northern durum. There were minimal to no changes in grading factors compared to last week; however, total damage did increase from 1.9% to 2.1%, resulting in the overall grade lowering from U.S. No. 1 Hard Amber Durum (HAD) to U.S. No. 2 HAD. The quality laboratory at North Dakota State University is in the process of finalizing tests on composites for inclusion in the northern durum regional crop quality report and USW's 2025 Crop Quality Report.
